Profile Summary

- Detail-oriented Data Analyst with 4+ years of experience transforming complex data into clear, actionable insights across FinTech and financial services.
- Proficient in SQL, Tableau, Power BI, and Excel; skilled at building dashboards and KPI frameworks to drive data-backed business decisions.
- Strong communicator and team collaborator with a passion for learning, working cross-functionally, and delivering measurable business value.
- Experience with AWS and Snowflake environments; thrives in fast-paced, innovation-driven teams with a customer-first mindset.
- Eager to help scale data maturity and continuously build automation and insight pipelines that enhance customer and team outcomes.

Technical Skills

Languages: SQL, Python, R, DAX

Data Visualization: Tableau, Power BI, Metabase, Excel, Looker

AI & LLM Tools: OpenAI models (GPT), Hugging Face Transformers, Prompt Engineering, Model Usage via APIs

Databases: Snowflake, AWS (S3, Redshift), PostgreSQL, MySQL

Tools: GitHub, JIRA, Confluence, Google Workspace

Soft Skills: Communication, Team Collaboration, Problem-Solving, Adaptability

Experience

Payscale

Aug 2024 – Mar 2025

Data Analyst

Remote

- Analyzed 5M+ transactional records using SQL and Snowflake, uncovering trends in customer engagement and operational performance that improved reporting accuracy by 20%.
- Designed Power BI and Tableau dashboards to monitor KPIs such as retention, conversion rate, and service response times, enabling leadership to track performance in real time.
- Automated reporting pipelines using optimized SQL queries in Snowflake, reducing manual reporting effort by 35% and accelerating weekly analytics delivery.
- Presented analytical findings and insights to cross-functional stakeholders with clarity and strategic context.

Credit Access Grameen Ltd.

Apr 2022 – Aug 2023

Data Analyst

Bengaluru, India

- Analysed payment transaction data to identify trends in customer usage and merchant activity.
- Queried large transactional datasets using SQL to support compliance reporting and operational insights.
- Worked closely with product teams to measure the impact of new features and improvements on user behavior.
- Created dashboards in Power BI for visualizing support ticket trends and response time SLAs.
- Collaborated with internal development and QA teams to align metrics tracking with key business objectives.

Genpact

June 2020 – Mar 2022

Data Analyst

Hyderabad, India

- Supported analytics projects for financial and retail clients by analyzing operational and customer datasets.
- Automated recurring reporting pipelines using SQL and Python, reducing the manual reporting effort by 30%.
- Managed and cleaned large datasets in SQL to prepare accurate reporting for compliance and internal KPIs.
- Developed Power BI dashboards to visualize operational KPIs and performance metrics for leadership teams.
- Worked directly with team leads to translate business questions into clear data queries and insights.

Projects

Customer Behavior & Retention Analysis

- Analyzed customer and transactional datasets using SQL and Python to identify behavior patterns, engagement trends, and retention opportunities across cohorts.
- Performed cohort analysis to evaluate customer life cycle trends and understand changes in retention over time.
- Built Power BI dashboards to visualize retention KPIs, engagement trends, and customer segments for stakeholders.
- Used pandas for data cleaning and transformation, improving consistency and accuracy across analysis datasets.
- Identified key drivers impacting retention and provided recommendations to improve customer engagement.
- Presented findings through dashboards and summaries, translating complex analysis into clear business insights.

Financial Performance & KPI Dashboard

- Built a financial KPI dashboard using Power BI and Excel to track revenue trends, cost patterns, and operational performance metrics.
- Used SQL to extract and transform financial datasets from structured databases for recurring reporting and analysis.
- Automated reporting workflows using SQL and Excel, reducing manual effort and improving consistency of financial reports.
- Developed Excel models using pivot tables and formulas to analyze performance trends and monthly variance patterns.
- Performed data validation checks to ensure accuracy and reliability of financial reporting outputs.
- Delivered insights through dashboards and reports to explain performance trends and support data-driven decision-making.

Education

Florida Atlantic University

Masters in Computer Science

Florida, USA
