Profile Summary

- Detail-oriented Data Analyst with 4+ years of experience transforming complex data into clear, actionable insights.
- Proficient in SQL, Tableau, Power BI, and Excel; skilled at building dashboards and KPI frameworks to drive data-backed business decisions.
- Strong communicator and team collaborator with a passion for learning, working cross-functionally, and delivering measurable business value.
- Experience with AWS and Snowflake environments; thrives in fast-paced, innovation-driven teams with a customer-first mindset.
- Eager to help scale data maturity and continuously build automation and insight pipelines that enhance customer and team outcomes.

Technical Skills

- **Languages:** SQL, Python,R,DAX
- **Data Visualization:** Tableau, Power BI, Metabase, Excel,Looker
- **AI&LLM Tools:** OpenAI models (GPT), Hugging Face Transformers, Prompt Engineering, Model Usage via APIs
- **Databases:** Snowflake, AWS(S3, Redshift, PostgreSQL, MySQL
- **Tools:** GitHub, JIRA, Confluence, Google Workspace
- **Soft Skills:** Communication, Team Collaboration, Problem-Solving, Adaptability

Experience

Core & Main

Dec 2025 – Present

Data Analyst

Remote, USA

- Owned dashboard creation and KPI tracking to monitor user interactions across internal business tools, reducing reporting lag by 28%.
- Created interactive Tableau dashboards and scheduled Power BI reports to summarize team performance and product usage.
- Built SQL queries to provide real-time visibility into supply chain, operational performance, and business metrics for stakeholders.
- Collaborated cross-functionally with Product and Operations teams to identify optimization opportunities in tool utilization workflows.
- Developed reporting frameworks for key business metrics that were incorporated into weekly and monthly executive reviews.

Payscale

Aug 2024 – Sep 2025

Data Analyst

Remote, USA

- Analyzed 5M+ transactional records using SQL and Snowflake, uncovering trends in customer engagement and operational performance that improved reporting accuracy by 20%.
- Designed Power BI and Tableau dashboards to monitor KPIs such as retention, conversion rate, and service response times,enabling leadership to track performance in real time.
- Automated reporting pipelines using optimized SQL queries in Snowflake, reducing manual reporting effort by 35% and accelerating weekly analytics delivery.
- Presented analytical findings and insights to cross-functional stakeholders with clarity and strategic context.

Credit Access Grameen Ltd.

Aug 2021 – Dec 2023

Data Analyst

Bengaluru, India

- Analysed payment transaction data to identify trends in customer usage and merchant activity.
- Queried large transactional datasets using SQL to support compliance reporting and operational insights.
- Worked closely with product teams to measure the impact of new features and improvements on user behavior.
- Created dashboards in Power BI for visualizing support ticket trends and response time SLAs.
- Collaborated with internal development and QA teams to align metrics tracking with key business objectives.

Projects

Enterprise KPI & Executive Reporting Dashboard

SQL, Snowflake, Power BI, Excel

- Built a centralized executive reporting dashboard to track revenue, customer growth, product adoption, and operational KPIs.
- Developed SQL queries using joins, CTEs, window functions, and aggregations to transform raw business data into reporting-ready datasets.
- Designed interactive Power BI dashboards with filters, drill-down views, KPI cards, and trend visualizations for leadership reporting. Automated weekly and monthly reporting workflows, reducing manual reporting effort and improving decision-making visibility.

Supply Chain Performance Analytics Platform

SQL, Snowflake, AWS S3, Power BI

- Analyzed inventory, shipment, supplier, and order fulfillment data to identify operational bottlenecks and delivery performance trends.
- Built SQL-based KPI logic to calculate inventory turnover, order fulfillment rate, supplier performance, backorder rate, and delivery delays. Loaded and organized supply chain datasets using AWS S3 and Snowflake to support scalable reporting and analytics workflows.
- Created Power BI dashboards to monitor warehouse performance, stockout risks, delayed shipments, and supplier scorecards.

AI-Powered Customer Feedback & Support Analytics

Python, SQL, OpenAI API, Power BI

- Built an AI-enabled analytics solution to classify customer feedback, support tickets, and product reviews by sentiment and issue category.
- Used Python and OpenAI API prompts to perform sentiment analysis, topic extraction, complaint categorization, and automated summary generation. Stored processed feedback results in SQL tables and created structured datasets for reporting and trend analysis.
- Developed Power BI dashboards to visualize customer sentiment, top complaint areas, satisfaction trends, and support performance metrics.

Education

Florida Atlantic University

Masters in Computer Science

Florida, USA
